Gentlemen:

Re: Application No. 3-000258

We forward herewith Part B, Eng. Form 4345-1, subject to the following comments:

Previously forwarded to you by our letter of September 29, 1971, this form has been revised to include additional parameters as follows:

Page 2B - Added: Phosphorus-Ortho (as P) 70507 and Sulfate 00945.

Page 4B - Added: Copper-Total 01042 and Iron-Total 01045.

Page 5B - Added: Sodium-Total 00929 and Tin-Total 01102.

Page 7D - Added: B-4 Remark "a."

Copies of this letter and contents are being forwarded to the Division of Water Pollution Control of the Commonwealth of Massachusetts.

Very truly yours,

Executive Vice President

Gentlemen:

Re: Application No. 3-000258

In accordance with your "Application Review" of 2 August, 1971, we forward herewith Part B - Eng. Form 4345-1, subject to the following comments:

Evaluation of the parameters required for SIC 3069 does not include that for sulfate which is delayed because your addendum requiring it was received after the sample was tested. We expect to forward this within two weeks.

We also expect to forward test results for parameters indicated to be present in Item 23 (Discharge Contents) in Section II of Eng. Form 4345-1 within two weeks.

Copies of this letter and contents are being forwarded to the Division of Water Pollution Control of the Commonwealth of Massachusetts.

Very truly yours,

T. C. Weaver
Executive Vice President

Copy of Application for Permit to Discharge--Parts I & II

New England Division
Corps of Engineers
424 Trapelo Road
Waltham, Mass. 02154

WATER
August 26, 1971

Attention: Chief, Permits Branch

Gentlemen:

Re: Application No. 3-000258

In accordance with your letter of 2 August 1971, we forward herewith Sections I and II of our permit application, corrected in accordance with the following comments (referenced to your "Application Review"):

- 4 a) Section I: Numerical values in Items 13 and 14 were in error. These have been corrected.
- 4 b) Section I: "Significant difference between intake volumes (Section I, Item 13) and discharge volumes (Section I, Item 15 - corrected - and Section II, Item 22)" attributed to water used for industrial washing, sanitary purposes, industrial refrigeration and some air conditioning--all to the municipal sanitary sewer.
- 4 c) Serial No. 001: No comment necessary.
- 4 d) Serial No. 001: In accordance with our assigned classification as a "Critical Industrial Process/Activity," we will comply with your request to complete Part B and submit prior to the 1 October 1971 deadline.

We have also corrected Section II, Item 23, to include Sodium with the list of discharge contents that are "present."

Copies of this letter and contents are being forwarded to the Division of Water Pollution Control of the Commonwealth of Massachusetts.

Very truly yours,

T. C. Weaver
Executive Vice President
